Leidos  
Columbia, MD

March 20, 2024

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer Intern position at Leidos, specifically within the Cyber SIGNIT Solutions Operation in Columbia, MD. Currently enrolled as a senior in a Systems Engineering program, I am enthusiastic about contributing to important operational programs and leveraging my skills and knowledge in software development, Linux, and programming languages like Python and Java.

With a strong interest in understanding complex systems at a fundamental level and experience in networking implementations, I am excited about the opportunity to work on software engineering tasks, including design, development, testing, troubleshooting, and debugging of software programs. My passion for technology, combined with my active pursuit of a Top Secret Security Clearance eligibility, aligns well with the requirements of the position.

Furthermore, I have practical experience in containerization, virtualization, and cloud technologies such as Docker, Kubernetes, AWS, and GCP, which I believe will be valuable assets in supporting the development and maintenance of infrastructure and platforms, as outlined in the job responsibilities.

I am particularly intrigued by the focus on machine learning applied to real tactical problems, and I am eager to apply my skills in this area to contribute effectively to the innovative projects at Leidos.

Thank you for considering my application. I am looking forward to the possibility of discussing how my background, skills, and interests align with the dynamic and impactful work at Leidos.

Adem Mcharek
