Chime
San Francisco, California

March 20, 2024

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the App Journey team role at Chime, where the mission of making financial peace of mind a reality resonates deeply with my values and aspirations. As a dedicated Bachelor in Artificial Intelligence student with a strong foundation in machine learning, deep learning, and cloud computing, coupled with hands-on experience in AI research and computer vision projects, I am excited about the opportunity to contribute to Chime's innovative approach to online banking.

My experience in developing AI applications, such as orchestrating an AI Research Assistant and implementing a PyTorch CNN for image classification, alongside my leadership as the Founder and President of the "AI Club," have equipped me with the technical skills and collaborative mindset necessary for excelling in the role at Chime. Moreover, my proficiency in backend development and frameworks, including Python and TensorFlow, aligns well with the job requirements, and I am eager to further enhance my skills in mobile development and architectural patterns by working with your knowledgeable team.

Chime's focus on empowering individuals to achieve financial progress through innovation and transparency truly inspires me, and I am keen on contributing to your impactful initiatives. I am excited about the prospect of leveraging my technical expertise to simplify app development processes and enhance member experiences. I look forward to the opportunity to discuss how my skills and passion for learning can contribute to the success of the App Journey team at Chime.
