Visa
Foster City, California

March 20, 2024

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Software Engineer internship position at Visa, a company dedicated to removing barriers and connecting more people to the global economy through innovative financial infrastructure. Currently pursuing a Bachelor's degree in Artificial Intelligence at Long Island University, with a strong GPA of 3.88/4.00, I am excited about the opportunity to apply my skills and knowledge in a dynamic and impactful environment like Visa.

With a foundation in Artificial Intelligence and a passion for technology, I have engaged in projects that involved optimizing algorithms and modeling for practical applications. These experiences have honed my ability to translate complex concepts into actionable solutions, aligning well with the requirements at Visa for analyzing, designing, and unit testing software solutions.

Furthermore, my academic background has equipped me with a solid understanding of software engineering concepts and methodologies, as well as good analytical and problem-solving skills. I have experience with programming languages such as [mention specific languages from the job requirements or your resume], and have worked on projects that required familiarity with software testing principles and the development of automation tools.

I am highly driven, resourceful, and results-oriented, traits that I believe align with Visa's commitment to innovation and excellence. I am eager to contribute to Visa's mission and be part of a team that leverages cutting-edge technology to shape the future of global transactions. I look forward to the opportunity to further discuss how my background and skills can contribute to Visa's continued success.
