Intel  
Santa Clara, California

March 20, 2024

Dear Hiring Manager,

As a dedicated student pursuing a Bachelor's degree in Artificial Intelligence with a strong foundation in Machine Learning, Deep Learning, and Software Engineering at Long Island University, I am excited to apply for the position at Intel, specifically focusing on User Interfaces development and technology automation.

With hands-on experience as an AI Research Assistant and proficiency in developing Convolutional Neural Networks and computer vision projects, I have honed my skills in transforming complex technical concepts into practical solutions. The opportunity at Intel to design, develop, and support User Interfaces for platform and manufacturing technologies aligns perfectly with my academic background and project experiences.

Moreover, my leadership role as the Founder and President of the "AI Club," where I led a community of over 50 AI enthusiasts in innovative projects, reflects my ability to manage work assignments independently through complete project lifecycle management. I am enthusiastic about the chance to contribute my analytical acumen and technical skills to Intel's cutting-edge projects.
