Recorded Future
Somerville, Massachusetts

March 20, 2024

Dear Hiring Manager,

I am writing to express my enthusiasm for the Data Engineering Intern position at Recorded Future. With a Bachelor's in Artificial Intelligence from Long Island University and a strong passion for utilizing technology to solve complex problems, I am eager to contribute to your mission of empowering organizations with real-time threat intelligence.

My academic background and hands-on projects, such as developing a PyTorch CNN for classifying handwritten digits and creating a hand gesture recognition system using TensorFlow, have equipped me with the Python programming and data skills necessary for this role. My experiences in AI research and computer vision have honed my ability to work with large, complex data structures, a skill vital for implementing techniques to harvest credentials on the dark web.

I am particularly drawn to Recorded Future's innovative approach in the cybersecurity and intelligence fields, and I am excited about the opportunity to learn from experienced professionals while contributing to the Security Intelligence graph. My attention to detail and excellent communication skills, as demonstrated in my project collaborations and leadership roles, align well with the responsibilities of the position.

I believe that my technical expertise, coupled with my drive for continuous learning and innovation, make me a strong fit for the Data Engineering Intern role at Recorded Future. I am eager to bring my unique perspective and contribute to a company that values high standards, inclusion, and ethical practices.
