Roku
San Jose, California

March 20, 2024

Dear Hiring Manager,

As a current student pursuing a Bachelor's degree in Computer Science at my university, with a deep passion for software development and a keen interest in the latest technology trends, I am excited to express my interest in the Software Engineer Intern position at Roku.

My academic background in Computer Science equips me with a solid foundation in software development principles and various programming languages, including Python, Java, and C++. Beyond academics, I have actively engaged in non-academic coding experiences such as personal projects and open-source contributions on Github, demonstrating my practical coding skills and commitment to continuous learning.

The opportunity to join the innovative team at Roku as a Software Engineer Intern aligns perfectly with my career aspirations. I am particularly drawn to the prospect of participating in your 12-week internship program, where I can explore diverse software engineering possibilities such as embedded systems, test engineering, and hardware development.

I am impressed by Roku's commitment to driving global TV streaming and its emphasis on creativity and technology. I am excited about the chance to contribute to your mission of connecting consumers to the content they love, while gaining valuable experience across multiple disciplines within a fast-paced and collaborative environment.

I am thrilled at the thought of collaborating with a network of innovators and disruptors at Roku, as I believe it will provide me with the platform to make a meaningful impact while further developing my skills and knowledge in software engineering.
