Rivian
Irvine, California

March 20, 2024

Dear Hiring Manager,

I am writing to express my strong interest in the Internship position at Rivian as advertised. With a Bachelor's degree in Artificial Intelligence from Long Island University and hands-on experience in AI research and development, I am excited about the opportunity to contribute to Rivian's innovative projects.

My involvement as an AI Research Assistant, where I led the development of AI systems for real-time academic literature retrieval and implemented Convolutional Neural Networks for image classification, has equipped me with the skills in embedded platform architecture, Python, and C programming, aligning well with the requirements of the position at Rivian.

I am particularly drawn to Rivian's dedication to environmental sustainability and technical precision in the automotive industry. My background in AI, machine learning, and software engineering, coupled with a passion for cutting-edge technologies, positions me well to support Rivian's mission of innovation and global impact.

I am enthusiastic about the opportunity to contribute to the design and implementation of a Software Application Framework at Rivian, working collaboratively with peers and stakeholders to address hardware and software challenges. My experience in project leadership and problem-solving, including winning accolades in international competitions, reflects my commitment to excellence and innovation.

Thank you for considering my application. I am eager to bring my skills and enthusiasm to the Electrical Hardware team at Rivian and contribute to the company's pioneering initiatives.
